Maxteq Appointed as ROTOCONTROL Agent in Australia and New Zealand

Agreement follows Maxteq's visit to the ROTOCONTROL stand at Labelexpo Americas.

LINAU, Germany (November 22, 2018) – ROTOCONTROL has signed Maxteq Pty Ltd as local representative in Australia and New Zealand for its suite of finishing machines providing label inspection, slitting, rewinding, die cutting, overprinting, digital and booklet printed labels. The agreement was finalized after Andrew Maxwell, technical director of Maxteq visited the ROTOCONTROL stand at Labelexpo Americas to evaluate first-hand the company's latest in label finishing technology.

"I was impressed with ROTOCONTROL's live demonstrations on three of their label finishing solutions during Labelexpo Americas," said Maxwell. "Their proven German engineering in highly customized machines along with a strong backing in manufacturing expertise by their parent company EMT has proven successful at an international level. There is a strong market here for ROTOCONTROL in Australia and New Zealand."

Maxteq is an Australian-based print trade house representing international manufacturers of quality printing presses, finishing and print machinery as well as printing consumables. Their customers range from the small boutique companies to large international corporations. Maxteq prides themselves on being representative and suppliers of the highest quality products, from the smallest chamber seal to full scale printing presses.

Featured on ROTOCONTROL's stand during Labelexpo Americas was the DT-Series 340 for advanced finishing of digitally preprinted label rolls, the FC-Series 540 fully-automatic turret for rewinding of pressure sensitive self-adhesive labels, and the RSC-Series 440 high-performance, compact, extremely robust label slitter/rewinder.

About Rotocontrol International GmbH

ROTOCONTROL, a wholly owned subsidiary of EMT International (www.emtinternational.com), designs and manufactures leading-edge finishing machines for label inspection, slitting, rewinding, die cutting, overprinting, digital and booklet printed labels, for converters in the narrow web industry. Available globally, ROTOCONTROL offers machines from smaller basic rewinders to feature-rich, sophisticated models with multiple options featuring S-Drive servo technology enabling maximum web control for the most delicate film and foil materials.

With production facilities, sales, and service in Germany and the USA, ROTOCONTROL maintains the highest level of product quality through ease of use, absolute control and flexibility with a focus on operator safety and efficiency. ROTOCONTROL is the partner of choice in the finishing of label products.
