Tape Converter Alfast Chooses ROTOCONTROL RCF Finishing Machine

The installed machine is die cutting and laminating 3M tape for wind turbines.

LINAU, Germany (July 17, 2018) – Alfast, a Danish tape converter for 3M and Tesa recently installed a customized ROTOCONTROL RCF 340 finishing machine designed for die cutting, rewinding, and laminating 3M tape, used in the protection of wind turbine blades. The machine was successfully installed at Alfast last month.

Per Lindberg Jørgensen, director of Alfast explains the choice for ROTOCONTROL: “Ease of operation was the primary reason, from navigating software, initial job set-up, and die cutting tools to quickly and efficiently run production. ROTOCONTROL was extremely professional, from the initial sale to the machine installation at my factory.”

The ROTOCONTROL RCF series of servo-controlled finishing machines are designed as a robust, configurable platform for the addition of various standard and custom modules as required by specific customer applications.

Founded more than 25 years ago, Alfast is a rapidly growing niche business, specializing in converting 3M and Tesa tape to meet customer-specific criteria. Quality, service and delivery reliability have made Alfast one of Scandinavia’s most well-known and reputable companies in the industry.

Marco Aengenvoort (managing director, ROTOCONTROL), Per Lindberg Jørgensen, and Alexander Siegmund (operations manager, ROTOCONTROL)

About Rotocontrol International GmbH

ROTOCONTROL, a wholly owned subsidiary of EMT International (www.emtinternational.com), designs and manufactures leading-edge finishing machines for label inspection, slitting, rewinding, die cutting, overprinting, digital and booklet printed labels, for converters in the narrow web industry. Available globally, ROTOCONTROL offers machines from smaller basic rewinders to feature-rich, sophisticated models with multiple options featuring S-Drive servo technology enabling maximum web control for the most delicate film and foil materials.

With production facilities, sales, and service in Germany and the USA, ROTOCONTROL maintains the highest level of product quality through ease of use, absolute control and flexibility with a focus on operator safety and efficiency. ROTOCONTROL is the partner of choice in the finishing of label products.
