ROTOCONTROL Makes Debut Labelexpo Americas Show with EMT International

Show visitors will see the latest in finishing technologies on booth 3511.

LINAU, Germany (August 17, 2018) – Bringing their “Finish First” theme unveiled at Labelexpo Europe 2017, ROTOCONTROL will join EMT International in their first exhibition at Labelexpo Americas 2018. Visitors to the show can find an array of ROTOCONTROL and EMT International finishing technologies in hall C, booth 3511.

Finish FIRST with ROTOCONTROL

With three machines showcasing a range of finishing innovations with live demonstrations, ROTOCONTROL is urging printers and converters to finish first and in control, at a very crucial part of the printing process.

On stand will be the **DT-Series 340** for advanced finishing of digitally preprinted label rolls, the **FC-Series 540** fully-automatic turret for rewinding of pressure sensitive self-adhesive labels, and the **RSC-Series 440** high-performance, compact, extremely robust label slitter/rewinder.

EMT International finishing solutions

EMT will provide technical information and application support for their Chameleon high speed inkjet finishing solutions. Additionally, label punching, die cut units and a variety of label press auxiliary components including shafts, slitter holders, and plow folding solutions will be displayed.

“Visitors to our stand at Labelexpo Americas can expect a range of innovative finishing solutions for conventional and digital labels, with customization capability that reflects the needs of the North American market,” said Marco Aengenvoort, ROTOCONTROL managing director. “This show will further demonstrate the strength of EMT and ROTOCONTROL’s combined forces in technology, manufacturing, and support.”
