Another ROTOCONTROL DT Series machine for further finishing of digitally printed labels destined for the Gundlach Packaging Group

Logo Etiketten GmbH, based in Mahlberg - part of the Gundlach Packaging Group - is adding another machine from ROTOCONTROL to its production facility for the third time.

LINAU, Germany (September 26, 2018) – German printer Logo Etiketten has confirmed their third order with ROTOCONTROL for a [DT340-series machine](#) for the finishing of digitally preprinted label rolls. Leading the sale was Printcon, the local ROTOCONTROL representative in Southern Germany, Austria and Switzerland.

Quality, reliability, stable design, technical know-how, price-performance ratio, and machine speed were features of the ROTOCONTROL DT340-series machine that resulted in Logo Etiketten's purchase. Their modular machine on order is configured with an unwind unit for 1200 mm rolls, Vetaphone corona unit, two Bobst flexo printing units, a semi-rotary cold foil unit, a semi-rotary die cutting unit with a Kocher + Beck Gapmaster, a GEW UV curing system, a Nikka label inspection system, and the ROTOCONTROL EPOS automated slitting system with shear knives.

ROTOCONTROL DT-Series machine

The Gundlach Packaging Group is a combination of three packaging specialists with headquarters in Oerlinghausen. At the Mahlberg site, the team of experts at Logo Etiketten GmbH bundle their expertise in conventional and digitally printed labels, shrink sleeves and banderoles. "Logo Etiketten is a recognized specialist in label printing with a broad, international focus," said Marco Aengenvoort, managing director of ROTOCONTROL. "It's an honour to receive their third ROTOCONTROL machine order, this time to complement their digital label production." There are already two ROTOCONTROL RSC440 inspection/slitting machines at the Mahlberg location.

About Rotocontrol International GmbH

ROTOCONTROL, a wholly owned subsidiary of EMT International (www.emtinternational.com), designs and manufactures leading-edge finishing machines for label inspection, slitting, rewinding, die cutting, overprinting, digital and booklet printed labels, for converters in the narrow web industry. Available globally, ROTOCONTROL offers machines from smaller basic rewinders to feature-rich, sophisticated models with multiple options featuring S-Drive servo technology enabling maximum web control for the most delicate film and foil materials.

With production facilities, sales, and service in Germany and the USA, ROTOCONTROL maintains the highest level of product quality through ease of use, absolute control and flexibility with a focus on operator safety and efficiency. ROTOCONTROL is the partner of choice in the finishing of label products.
