

# RSC Series Vertical Inspection Slitter/ Rewinder

The ROTOCONTROL RSC offers a full suite of standard features in an economical, compact, extremely robust machine designed to maximize operator efficiency. Standard features such as cartridge slitting system, vertical inspection zone, auto- matic tension control, S-Drive servo driven operation, job save and simple, functional controls means more time producing labels and less time in set up.

## Standard Features Include:

- Moveable Operator Console- Touch Screen
- Vertical inspection zone for fault placement
- 340, 440 or 540 mm web widths
- Servo motor control on draw station, rewind and unwind
- Label counting inc. butt cut
- Waste reducing shortened webpath
- Fully automatic tension control including acceleration and deceleration
- 800mm capacity onboard unwind
- Single edge ultrasonic webguide
- 500mm rewind capacity
- Adjustable rewind height
- Cartridge slitting system
- Web clamp/ outfeed nip

## Available Optional Components:

- Complete Film Package incl. dual rewind, auto- matic web clamps with lay-on rollers, cartridge razor slitting, anti-static bars
- Flag millsplice detect with fault placement
- Shear and razor cartridges
- NEW! EPOS (Electronic Knife Positioning System)
- 100% Vision Systems
- SVS Missing Label Detect
- Waste wind-up
- Vacuum splice table
- Roll lift

## Cartridge Slitting System Standard

- Shear or razor cartridges available
- Lateral slitting adjust
- One button slide out base cartridge with integrated ruler for fast, easy set-up
- One button slide out top cartridge
- Easy front or rear access to top blades for quick alignment to base shears
- Vernier blade height adjust
- Vernier fine lateral position adjust
- Integrated outfeed nip roller provides optimal cutting tension independent of rewind tension setting
