EMT International to Highlight New VLF (Variable Lane Finishing) Machine at PRINTING United Expo

Hobart, Wisconsin USA (October 12, 2022) – EMT International, [a market leader in finishing equipment and transport systems for the high speed, digital ink jet market](#) will highlight its new VLF (Variable Lane Finishing) machine on booth N2323 at [PRINTING United Expo](#) to be held October 19-21, 2022 in Las Vegas, NV, at the Las Vegas Convention Center.

The VLF is a new technology solution specially designed for processing sheets of photos or post cards. Order delivery per lane features a web width of 22", five independent lanes, finished orders by lane, is bar code driven, and can be built with the option of order verification and re-configuration for different format sizes. Available formats are 4x (4", 6", 7", 8") with options of 5" x 7", 6" x 9", 8" x 10". A video of the new VLF will be showcased on the EMT booth.

The new EMT International VLF machine

Information about EMT's broad range of Chameleon postpress printing and finishing products installed in-line with leading OEM print engines around the world will also be available, with capabilities including roll to roll (22"/30"/42"), cut & stack, fanfold solutions, dynamic perfining, multiple punching, merging and creasing solutions.

Also available will be information about Rotocontrol finishing machines for label inspection, slitting, rewinding, die cutting, overprinting, and digital and booklet printed labels that are popular in the narrow web industry.

Jim Driscoll, VP Sales of EMT International said: "We look forward to reuniting with familiar faces at PRINTING United Expo in Las Vegas and presenting our new VLF solution, in addition to our Chameleon line for the commercial inkjet market, and the Rotocontrol finishing machine portfolio serving label printers and converters. Team members from both EMT International and Rotocontrol will be available in the booth to discuss potential applications with show visitors."
