ROTOCONTROL Partners with AVT at Labelexpo Americas

Showcased in the AVT stand was the ROTOCONTROL RSP-V series pharmaceutical finishing machine with the AVT Helios II automatic inspection station.

Trittau, Germany (September 29, 2014) – ROTOCONTROL, [a manufacturer of leading-edge slitter/rewinder inspection machines](#) today announced their participation in the AVT stand at the recently held Labelexpo Americas. Showcased at the show with live printed label material demonstrations was the ROTOCONTROL RSP-V series pharmaceutical finishing machine equipped with the AVT Helios II automatic inspection station.

The ROTOCONTROL [RSP-V \(vertical\) series](#) machine is designed for compliance with the most demanding security label inspection and finishing applications. It incorporates a fully integrated 100% vision inspection system, such as the AVT Helios II, which stops the machine when a fault is detected prior to slitting or other post-inspection operations. Once the fault is corrected, the web is rewound back to where the fault was detected onto a high capacity rewind for re-inspection prior to slitting for 100% compliance requirements.

AVT's Helios is a superior line of automatic 100% print inspection solutions designed exclusively for labels and narrow web printing. [Helios II](#) can be seamlessly integrated into rewinder/finishing equipment to create a designated automatic inspection station for post print processes. A highly-reliable, market-proven solution, Helios II has been successfully installed worldwide on hundreds of presses and rewinders. Quickly and easily integrating on any press or rewinder for online quality assurance and process control, Helios II supports AVT's large and far-reaching global install base.

Marco Aengenvoort, Managing Director of ROTOCONTROL comments: "It was an honour to participate at Labelexpo Americas once again in the AVT stand, and to demonstrate our RSP-V pharmaceutical finishing technology with the AVT Helios II automatic 100% print inspection solution. Our long-standing partnership with AVT, which dates back to the inception of ROTOCONTROL, has been instrumental in providing finishing equipment with complementary and innovative technologies that benefit narrow web printers and converters."

About AVT

AVT (Advanced Vision Technology Ltd) is the world leader in print process control, quality assurance and color control for the packaging, labels, folding cartons, metal decoration and commercial print markets. AVT's products are sold to leading printing press suppliers, packaging, labels, commercial, semi-commercial, metal decoration and specialty printers in the web printing markets. More than 3,000 of AVT's signature systems for automatic inspection of packaging and labels converting are installed worldwide. In addition, more than 900 of AVT's Clarios closed loop color control systems are installed around the globe, showcasing the company's commercial sector prominence. AVT's global presence also includes 3,300 installations of Mercury color management and reporting software, and remote digital ink control systems.

AVT is headquartered in Hod-Hasharon, Israel with sales, marketing, and support offices in the United States, Europe and China. For more information, visit www.AVT-inc.com

About ROTOCONTROL

ROTOCONTROL designs and manufactures leading-edge finishing machines, including the LeoMat brand, for inspection, slitting, rewinding, die cutting, overprinting, digital labels and booklet labels for converters in the narrow web industry. Available globally, ROTOCONTROL offers machines from smaller basic rewinders to feature-rich, sophisticated models with multiple options featuring S-Drive Servo Technology enabling maximum web control for the most delicate film and foil materials.

Headquartered in Tritttau (Hamburg), Germany ROTOCONTROL maintains the highest level of product quality through ease of use, absolute control and flexibility with a focus on operator safety and efficiency. ROTOCONTROL is the partner of choice in the finishing of label products.

Speed is Nothing without Control.
