Another two ROTOCONTROL RSC Slitter/Rewinders for ROTOCON

South Africa continues to invest in ROTOCONTROL finishing machines, including a leading packaging manufacturer.

CAPE TOWN, South Africa (July 22, 2013) – ROTOCON, the local agent in South Africa for ROTOCONTROL/LeoMat brand of leading-edge finishing machines, today announced the sale of two new ROTOCONTROL RSC slitter/rewinders this month. One RSC finishing machine was sold to a leading packaging manufacturer.

A third RSC equipped with an AVT Helios First and Domino Inkjet for sequence numbering was also successfully installed at a South African converter. The installation was led by William White, a ROTOCON Service Technician recently engaged to increase local support and service of ROTOCONTROL finishing machines and the other ROTOCON principals in South Africa including MPS and Advanced Vision Technology (AVT).

The RSC slitter/rewinder, ROTOCONTROL's flagship finishing machine, offers a full suite of standard features in an economical, compact, extremely robust solution designed to maximize operator efficiency with minimal time in set-up. The two RSC configurations included a strobe light, the advanced vertical vacuum splice table with integrated waste rewind, and the AVT Helios 100% inspection technology system.

ROTOCONTROL RSC Slitter/Rewinder

Patrick Aengenvoort, Director of ROTOCON comments: "It has been a successful year for ROTOCON with all of the principals we represent including ROTOCONTROL, MPS, Pantec GS Systems, and Advanced Vision Technology (AVT). With the addition of William White to our service team, we are well-positioned to locally support our customers. We look forward to meeting many of our customers and new South African printers at the Labelexpo Europe exhibition in Brussels this September."
