## Unipack Industries Opts for ROTOCONTROL RSC Inspection Slitter/Rewinder Machine

*The RSC was demonstrated at The Technology Bar during Labelexpo India*

Ahrensburg, Germany (November 16, 2012) – ROTOCONTROL today announced the sale of an RSC 340 mm web width inspection slitter/rewinder machine to Unipack Industries, a converter in India that provides high-quality self-adhesive paper and plastic labels. The finishing machine was demonstrated in the debut of “Technology Bar” held within the Weldon Celloplast stand during Labelexpo India.

Leading the sale was Pawandeep Sahni, Director of Weldon Celloplast and Marco Aengenvoort, Managing Director of ROTOCONTROL. Features of the RSC include servo drive motor control on drawstation and rewind, servo drive touch screen operating interface, full-featured servo drive operator control software including job save, and a razor knife cartridge system.

Technology Bar, a new and innovative concept launched by Weldon Celloplast at Labelexpo India, provided visitors a centralized meeting point to view technology demonstrations and engage with over twelve of Weldon’s international partners. “The Technology Bar concept was a success,” comments Marco Aengenvoort. “Booth traffic to see the ROTOCONTROL machine was continuous and resulted in many leads from reputable Indian converters. In addition to the launch of their Technology Brochure, the entire Weldon Celloplast team did an outstanding job in promoting the narrow-web industry at Labelexpo India. We commend them for their efforts.”

With ROTOCONTROL’s acquisition of LeoMat earlier this year, a total of ten ROTOCONTROL/LeoMat finishing machines have been sold into India.
