ROTOCONTROL Demonstrating RSP Security Inspection Machine at Labelexpo Americas in AVT Stand

RSP to remain in the US and marks the 5th ROTOCONTROL finishing machine sold into North America

Ahrensburg, Germany (August 22, 2012) – ROTOCONTROL today announced the availability for demonstration of its RSP single pass 100% security inspection machine at Labelexpo Americas 2012 in the Advanced Vision Technology (AVT) Stand 711. Labelexpo Americas, the largest label converting event in the Americas, takes place September 11-13 in Chicago.

Designed for compliance with the most demanding security label inspection and finishing applications, the RSP will be demonstrated with the AVT PrintVision/Helios II, the industry leading 100% inspection technology designed to meet the requirements of any label and narrow web application. AVT's products are sold to leading printing press suppliers, packaging, labels, commercial, semi-commercial, newspaper and specialty printers in the web printing markets, worldwide.

After Labelexpo Americas, the RSP will be delivered to a converter in the US and marks the 5th ROTOCONTROL finishing machine sold into North America. One machine already delivered to a Canadian converter is an RSD die cutting slitting/rewinding finishing machine equipped with a RHINO™ Flat Bed Hot Foil Embossing module from Pantec GS Systems. The machine was installed in early August.

Features of the RSP include the ability to operate in 3 distinct levels of compliance conforming to the required level of security, an extremely small footprint requiring only 1.2 x 2.6 meters of floor space, and the revolutionary Vacuum Splice Table which delivers unprecedented operator efficiency by allowing automatic placement of mill-splice/flags, matrix/missing labels and vision detected defects right on the vertical inspection plate/waste rewind for reworking.

ROTOCONTROL RSP Single Pass 100% Security Inspection Machine

-more-

Marco Aengenvoort, Managing Director of ROTOCONTROL will attend Labelexpo Americas and comments: "We are pleased to demonstrate our RSP single pass 100% security inspection machine in the AVT stand as this prestigious event, which attracts converters from North America, Latin America and numerous other countries. Over 20 RSP machines have been sold throughout Europe, the United Kingdom, South America, Asia and recently in North America. It is an exciting time for ROTOCONTROL, especially with our entrance into the North American narrow web finishing market."

About ROTOCONTROL

ROTOCONTROL designs and manufactures leading edge finishing machines for inspection, slitting, rewinding, die cutting, overprinting, digital labels and booklet labels for converters in the narrow web industry. Available globally, ROTOCONTROL offers machines from smaller basic rewinders to feature-rich, sophisticated models with multiple options featuring S-Drive Servo Technology enabling maximum web control for the most delicate film and foil materials.

Headquartered in Ahrensburg (Hamburg), Germany ROTOCONTROL maintains the highest level of product quality through ease of use, absolute control and flexibility with a focus on operator safety and efficiency. ROTOCONTROL is the partner of choice in the finishing of label products.

Speed is Nothing without Control.
