▶ **ROTOCONTROL Celebrates Fifteen Installations of RSP 100% Security Inspection Machines**

The RSP Finishing Machines have been sold into the Cosmetic and Pharmaceutical industries throughout Europe, United Kingdom, South America and Asia

Ahrensburg, Germany (May 15, 2012) – ROTOCONTROL today announced its fifteenth successful installation of the RSP Single Pass 100% Security Inspection Machine, benefiting Cosmetic and Pharmaceutical industries throughout Europe, United Kingdom, South America and Asia.

▶ Initially unveiled at the 2010 edition of Labelexpo Americas, the RSP is specifically designed for compliance with the most demanding security label inspection and finishing applications and can operate in 3 distinct levels of compliance conforming to the required level of security including Full Compliance, Controlled Compliance and High Speed Inspection.

In Full Compliance mode, intended for applications where 100% compliant labels are guaranteed, a defective label must be corrected and re-inspected before the process can continue and cannot be overridden by an Operator. Controlled Compliance mode benefits finishing runs with premium value-add labels requiring the highest of quality but allows the operator discretion to re-inspect a corrected label or bypass the re-inspection system after manual inspection or correction has occurred. The High Speed Inspection mode for standard labels engages the 100% vision inspection system but does not utilize the re-inspection capability.

“One of the RSP features that appeals to Converters is the extremely small footprint: it only requires 1.2 x 2.6 meters of floor space plus the moveable control panel, which is critical in constrained manufacturing space as companies continue to expand with additional pre and post-press high technology equipment” comments Michael Aengenvoort, Business Development Manager for ROTOCONTROL.

The ROTOCONTROL RSP 100% Security Inspection Machine

-more-

Marco Aengenvoort, Managing Director of ROTOCONTROL comments: "I am pleased with the success to date of the RSP 100% Security Inspection Machine. Performance and reliability feedback has been extremely positive, and the product continues to be a strategic focus for ROTOCONTROL in addition to the Digital and Booklet machines now available through our LeoMat brand."

About ROTOCONTROL

ROTOCONTROL designs and manufactures leading edge inspection, slitting, rewinding and die cutting finishing machines for the narrow web industry. Available globally, ROTOCONTROL offers machines from smaller basic rewinders to feature rich, sophisticated models with multiple options. All utilize S-Drive Servo Technology enabling maximum web control for the most delicate film and foil materials. With the recent acquisition of LeoMat, advanced products including booklet insertion and digital finishing are immediately available.

Headquartered in Ahrensburg (Hamburg), Germany ROTOCONTROL maintains the highest level of product quality through ease of use, absolute control and flexibility. ROTOCONTROL is the partner of choice in the finishing of label products.

Speed is Nothing without Control.
