ROTOCONTROL Confirms Three Orders At Label Summit Africa

Spec Systems and Label and Litho place orders for ROTOCONTROL slitting, rewinding and die cutting finishing machines

Ahrensburg, Germany (March 19, 2012) – ROTOCONTROL today announced the receipt of another three finishing machine purchase orders in South Africa from Spec Systems, Label and Litho, and a third Converter. The orders were confirmed through the local Agent ROTOTEC at Label Summit Africa, and marks 21 finishing machines sold into South Africa.

Ordered by Colin Roux, Director and Steven Makepeace, Director of Spec Systems was an RSD Die Cutting, Slitting/Rewinding Finishing Machine. Technology features that led to the order include 100% servo Bosch Rexroth Drives, remote Service and Support through the Internet, and continued after sales and support based on a long-standing relationship with Michael, Pascal and Patrick Aengenvoort of ROTOTEC.

Spec Systems is a turnkey Auto ID solutions provider with more than 32 years' experience providing label, barcode, RFID and identity card printing products and solutions. Covering the entire value chain, from the manufacture of self-adhesive labels and printer ribbons to supplying and integrating barcode printing and management systems, Spec Systems is one of the few South African companies able to meet the market's every need.

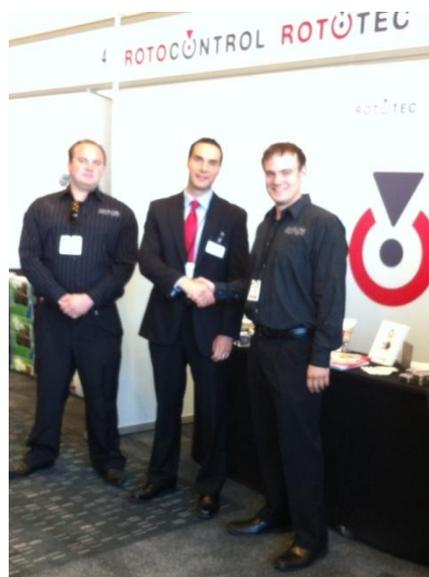

Barend Smit, Director of Label and Litho opted for their second ROTOCONTROL finishing machine also from a longstanding relationship with ROTOTEC who supplies their Tooling product. Dependable service and superior quality were factors that led to their additional ROTOCONTROL finishing machine investment.

Label & Litho is the main supplier of barcode and RFID labels in Northern Gauteng. The company is also the largest supplier of magnetic and other types of parking tickets nationally and aims to deliver customised printing to meet unique customer requests.

About ROTOCONTROL

ROTOCONTROL designs and manufactures leading edge inspection, slitting, rewinding and die cutting finishing machines for the narrow web industry. Available globally, ROTOCONTROL offers machines from smaller basic rewinders to feature rich, sophisticated models with multiple options. All utilize S-Drive Servo Technology enabling maximum web control for the most delicate film and foil materials. With the recent acquisition of LeoMat, advanced products including booklet insertion and digital finishing are immediately available.

Headquartered in Ahrensburg (Hamburg), Germany ROTOCONTROL maintains the highest level of product quality through ease of use, absolute control and flexibility. ROTOCONTROL is the partner of choice in the finishing of label products.

Speed is Nothing without Control.
