ROTOCONTROL Expands With Acquisition Of LeoMat

Also announced is the appointment of Peer Gronkowsky as Operations Manager

Ahrensburg, Germany (March 07, 2012) – ROTOCONTROL today announced the acquisition of Germany-based LeoMat, a major German supplier of processing machines for adhesive labels, foils and paper. The expansion is a result of significant sales growth from successful worldwide slitting, rewinding and die cutting finishing machine installations, as ROTOCONTROL enters its fourth year of operation.

Marco Aengenvoort, ROTOCONTROL Managing Director commented: “The acquisition of LeoMat marks an important milestone for the future of ROTOCONTROL. With this acquisition we have significantly increased our manufacturing and engineering capabilities which would be difficult to do so quickly organically. The company is now even more strongly positioned to offer Converters around the world a well-rounded product portfolio based on German design and manufacturing.”

ROTOCONTROL also announces the appointment of Peer Gronkowsky as Operations Manager. The former Plant Manager of LeoMat, Peer will oversee the ROTOCONTROL Service and Support, Research and Development, Engineering, Manufacturing and Purchasing departments. The LeoMat purchasing, manufacturing and engineering employees also joined the ROTOCONTROL team at headquarters in Ahrensburg. A company event was recently held to welcome LeoMat to the ROTOCONTROL team.

With the acquisition, the ROTOCONTROL product portfolio has expanded to include Digital and Booklet finishing machines, accelerating ROTOCONTROL’s growth plans in these markets. The existing LeoMat branded finishing machines will still be available to customers, and service for all installed LeoMat product is now available through ROTOCONTROL.

About ROTOCONTROL

ROTOCONTROL designs and manufactures leading edge inspection, slitting, rewinding and die cutting finishing machines for the narrow web industry. Available globally, ROTOCONTROL offers machines from smaller basic rewinders to feature rich, sophisticated models with multiple options. All utilize S-Drive Servo Technology enabling maximum web control for the most delicate film and foil materials. Headquartered in Ahrensburg (Hamburg), Germany ROTOCONTROL maintains the highest level of product quality through ease of use, absolute control and flexibility. ROTOCONTROL is the partner of choice in the finishing of label products.

Speed is Nothing without Control.
