Reynders Purchases Fourth ROTOCONTROL Slitter/Rewinder Inspection Machine

Latest machine investment for Reynders Pharmaceutical Labels nv

Ahrensburg, Germany (March 23, 2011) – ROTOCONTROL today announced the receipt of a purchase order from Reynders Pharmaceutical Labels nv in Belgium for an RSC Slitter/Rewinder equipped with an AVT Helios 100% Inspection System. Three other ROTOCONTROL Slitter/Rewinder Inspection Machines were previously purchased by Reynders Etiketten nv, also located in Belgium.

The new machine will include a vacuum splice table with integrated waste windup at the vertical inspection area, a recently released option available on all ROTOCONTROL RSC Slitter/Rewinder and RSP Single Pass 100% Security Inspection Machines.

Marc Reynders, CEO of Reynders_Label Printing commented, “Our current investment of three ROTOCONTROL inspection machines has proved very beneficial for label production at Reynders Etiketten nv. Significant growth within Reynders Pharmaceutical Labels resulted in a need to expand our slitting/rewinding and inspection capacity, and we naturally opted to invest in another ROTOCONTROL machine”.

Reynders Pharmaceutical Labels nv is specialized in the exclusive production of labels for the pharmaceutical industry with procedures entirely organized according to GMP (Good Manufacturing Practice).

About Reynders Label Printing

Reynders Label Printing is comprised of seven companies that are among the trendsetters of today's self-adhesive label industry. Our operating entities serve the specific requirements of the pharmaceutical industry, labels for cosmetics, personal care and luxury goods, labels for industrial applications, security and other types of complex labels. Together, we have an array of production capabilities including 40 printing presses and six different printing technologies, from traditional to digital, to provide an impressive range of high quality labels. Headquartered in Boechout, Belgium, Reynders also has operating facilities in France, Poland and India.
