Weldon Celloplast Secures First Order in India for ROTOCONTROL

The Converter ordered a ROTOCONTROL RSC slitter rewinder inspection machine

Ahrensburg, Germany (December 9, 2010) – Ralph Beier, ROTOCONTROL International Sales Manager, today announced the receipt of the first order in India for a RSC slitter rewinder inspection machine. The order was led by Weldon Celloplast, the recently appointed ROTOCONTROL Agent in India.

“This order was achieved through a combination of superior technology offering, a previous positive client relationship, and the availability of local Agent support” states Ralph Beier. “It shows that customers want a complete package including reliable support as well as technology”.

Features of the RSC slitter rewinder inspection machine that were key in the Converter’s purchasing decision were automatic tension control, missing label system and S-Drive servo driven operation.

Representatives from ROTOCONTROL are on-site at Labelexpo India in the Weldon Celloplast Stand B50 until December 11th.

About ROTOCONTROL

ROTOCONTROL designs and manufactures leading edge inspection, slitting, rewinding and die cutting finishing machines for the narrow web industry. Available globally, ROTOCONTROL offers machines from smaller basic rewinders to feature rich, sophisticated models with multiple options. All utilize S-Drive Servo Technology enabling maximum web control for the most delicate film and foil materials. Headquartered in Ahrensburg (Hamburg), Germany ROTOCONTROL maintains the highest level of product quality through ease of use, absolute control and flexibility. ROTOCONTROL is the partner of choice in the finishing of label products.

Speed is Nothing without Control.
