Reynders Etiketten nv selects ROTOCONTROL RSI 430 series inspection Machine

ROTOCONTROL receives order confirmation from Reynders Etiketten nv for the RSI 430 inspection machine providing fast, accurate, robust inspection, slitting and rewinding of labels

Ahrensburg, Germany (June 18, 2009) - Marco Aengenvoort, Managing Director, today announced the confirmed order from Reynders for the ROTOCONTROL RSI 430 series inspection Machine.

The ROTOCONTROL RSI 430 series of inspection machines are designed for fast, accurate, robust inspection, slitting and rewinding of all types of labels. The fully modular machines offer a rich suite of standard features as well as numerous options allowing tailored solutions for even the most demanding application.

“Reynders is one of the most respected label printers in the industry and I am extremely pleased that they have chosen the ROTOCONTROL RSI machine to advance their finishing capability.” states Marco Aengenvoort. “This order, coupled with our current order backlog of over 12 machines shows that the label industry is still aggressively pursuing the best technology available as a way of increasing efficiency and maintaining profit margins in these difficult times”.

Marc Reynders, Managing Director of Reynders Etiketten nv commented, “The ROTOCONTROL RSI 430 machine has the robust design and flexibility we need to maximize utilization and increase production throughput. In addition, our long-standing relationship with Marco Aengenvoort solidified our decision to partner with ROTOCONTROL.

Reynders is one of the leading manufacturers and service providers of label printing, transparent plastic labels, multi layered chemical labels to a large number of clients in the industry. Reynders printing labels are used for pharmaceutical, beauty & personal care, household and chemical, logistic & office, food & beverages, promotional, textile & garments, and industrial marking.
